PROJECTS

Creating a Database with SQL Server

- Created a SQL Database from scratch, starting off with a conceptual design, then normalizing relations, and finishing off with the physical design and implementation.
- Creating dummy data to populate tables created in the database and to ensure full functionality of the database for the client.

Creating an E-Commerce Webpage

- Created an E-Commerce webpage on WordPress using the WooCommerce plug-in.
- Populated the database of the webpage with products and price for products.

Business Intelligence using Tableau

- Cleaned a large credit card dataset using Tableau Prep to be able to analyze and make visualizations and assumptions of data.
- Created Dashboards and a Story on Tableau to better convey the findings of the analysis of the dataset.

Creating database and Web Application for the Federal Aviation Administration (FAA) - (*Ongoing project*)

- MIS Field Project working with clients in FAA creating a database and Web Application from scratch.
- Using SQL and MVC + Entity Framework (EF) to connect database to our web application for the client.

SKILLS

- Proficient in Danish, English, French, and Arabic.
- Proficient in Microsoft Office Applications, Visual Studio, and Tableau.
- Good public speaking, teamworking, and adaptability skills and highly responsible and reliable.
